# Data Analyst

## About the role

The role will be pivotal to driving key business decisions and influencing analytically-driven strategy. You will play an integral role in utilising all analysis (particularly surrounding raw data manipulation, customer value management and commercially-focused business strategy) in order to implement change and improve overall business performance.

You will help develop strategy and deliver recommendations for all key areas and will have the ability to interact with all analytical and data management teams as well as senior executives.

- The very best analytical and problem solving skills and a real passion for big data
- Dedication to deliver team and business objectives and a willingness to learn new skills as systems and needs develop
- Extensive and detailed knowledge of Excel and SQL is essential
- The candidate would preferably have a quantitative degree (e.g. maths, physics, computer science, engineering, etc.)
- 5+ years' experience in a data analysis related field
- Knowledge of KNIME, Python, R or other statistical analysis tools would be an advantage
- Ability to read PHP and/or Java would be an advantage
- Good communication skills and ability to interact at all levels within the business, both technical and non-technical
- Strong organisation skills and ability to multitask
- Strong ability to work independently and as part of a team
- Comfortable working in a dynamic and fast-paced environment with tight deadlines... and a sense of humour is a must!

## What's in it for you?

- Competitive package, bonus scheme and recognition awards
- Company-wide pension scheme and private health insurance
- Flexible personal interest allowance, development and training
- Extra half day holiday on your birthday every year
- Family friendly with maternity/paternity allowance
- Wide range of social events including legendary Christmas and summer parties
- Excellent exposure in a fast-paced environment whilst being challenged and rewarded
